

# Environmental Sciences Immersion Program

9 Saturday Afternoons:  
Oct 5th to Nov 30th

**(E-SIP)**

**(1 - 4PM PST)**

**LOCATION: ZOOM VIRTUAL CLASSROOM**

Are you interested in exploring your opportunities in Environmental Sciences during college and in a career? E-SIP is a way to learn from those inside the world of Environmental Sciences!

**Interested?**

**More Info & the Application are at**

**[www.impactinternships.org/esip](http://www.impactinternships.org/esip)**

**Application Deadline:**

**Saturday, September 28th**

Studying the interactions between the varying components of our community, environmental scientists seek understanding and solutions to the impact humans have on the world around us. Over the course of 9 Saturday afternoons in Fall 2024, high school students will learn about their potential future opportunities throughout the Environmental Sciences field as it relates to an education, a career and creating solutions that can have a positive impact. During E-SIP students will hear presentations from professionals working in the environmental sciences field, participate in interactive workshops and experience the field firsthand by collaborating on a small facilitated group project related to core principles in the field of environmental science. E-SIP will be a fun and transformative way for high school students to learn more about their future opportunities in STEM and the diverse field of environmental science this Fall!

- **We will hear from working professionals in the Environmental Sciences field who have experience in fields such as bioengineering, climate change,**
- **Prepare for college admissions as well as career options & pathways in our program facilitated workshops**
- **Work collaboratively on a small team project where students will experience how real world professionals study environmental sciences to solve problems and cultivate solutions**
- **Learn more about your potential career opportunities to make a positive impact on the world around you using Environmental Sciences**
